SKILLS AND COMPETENCIES

Programming & Development

- Python (Django, Automation, Data Analysis)
- Web Technologies (HTML, CSS, JavaScript)
- Version Control (Git/GitHub)

Data & Analytics

- Data Visualization (Power BI, Tableau)
- SQL (MySQL, PostgreSQL/PostGIS)
- Advanced Excel (Pivot Tables, VLOOKUPs, Power Query)

Infrastructure & Networking

- Network Configuration & Maintenance
- Server Management
- Cabling & Physical Infrastructure
- System Administration (Windows Server, Linux)

Systems & ERP

- ERP Platforms (APEX, Pastel)
- Systems Analysis & Design
- IT Service Management

Cybersecurity & Risk

- Data Backup & Disaster Recovery
- CCTV & Physical Security
- Cybersecurity Fundamentals

Core Competencies

- Business-Technology Translation
- Stakeholder Communication
- Problem-Solving
- Project Coordination
- Attention to Detail

PROFESSIONAL SUMMARY

Aspiring Systems Analyst and final-year Information Systems student who bridges the gap between business and technology, from physical infrastructure to intelligent automation. Not a desk-bound theorist: I have physically upgraded server hardware, optimized network cabling, and coded Python solutions that slash legal processing time by 80%.

Hands-on experience maintaining mission-critical ERP systems (APEX/Pastel) and ensuring business continuity through robust data backups and low-downtime network management. My final-year thesis tackled a US$1.2 billion challenge in Zimbabwe's agricultural sector with a data-driven decision-support system. Seeking a graduate role in Data Analytics, Systems Analysis, or Software Development.

WORK EXPERIENCE

IT Support Technician Intern Jan 2025 – Feb 2026

Bowtracker Safaris, Antelope Park

- Managed end-to-end IT infrastructure (computers, servers, routers, network cabling) to maintain **99.9%** system uptime, safeguarding business continuity and team productivity.
- Spearheaded a hardware modernization initiative, upgrading legacy HDDs to high-speed SSDs and optimizing WiFi networks, cutting boot and load times and removing performance bottlenecks.
- Implemented automated, redundant data backup protocols, ensuring rapid disaster recovery and protecting sensitive business data from loss or corruption.
- Audited, inspected, and optimized the physical network cabling architecture, from tower transmission points to destination endpoints, ensuring signal integrity and future-proofing the network.

Freelance Developer Jan 2024 – Present

- Designed and deployed custom web-based solutions for diverse small businesses, translating vague client requirements into intuitive, user-friendly software that streamlines daily operations.
- Engineered Python-based automation solutions for clients, including a legal firm (see Key Projects).

KEY PROJECTS

- **SeedChain Zimbabwe (Final-Year Thesis Project):** Developed a USSD-based, blockchain-enabled seed authentication and traceability platform for Zimbabwe's agriculture sector, letting farmers verify product authenticity while giving manufacturers a web-based dashboard that shows where their products are verified, product performance, and counterfeit verification data. Built with Python (Django), Africa's Talking for USSD, and PostgreSQL with PostGIS.
- **Legal Document Processing:** Engineered a Python automation tool for a legal firm, slashing manual document processing time by **80%** and virtually eliminating human data-entry errors.

EDUCATION

Bachelor of Commerce Honours Degree in Information Systems — Expected 2026
Midlands State University

Degree Class: Pending

Advanced Level Certificate — 2022

ZIMSEC: 3 Passes

Ordinary Level Certificate — 2020

ZIMSEC: 7 Passes including Mathematics and English

ADDITIONAL INFORMATION

- **Languages:** English (fluent), Shona (native)
- **Availability:** Immediate start
