SKILLS AND COMPETENCIES

Programming & Development: Python (Automation, Data Analysis), Web Technologies (HTML, CSS, JavaScript), Version Control (Git/GitHub)

Data & Analytics: Data Visualization (Power BI, Tableau), SQL (MySQL, PostgreSQL), Advanced Excel (Pivot Tables, VLOOKUPS, Power Query)

Infrastructure & Networking: Network Configuration & Maintenance, Server Management, Cabling & Physical Infrastructure, System Administration (Windows Server, Linux)

Systems & ERP: ERP Platforms (APEX, Pastel), Systems Analysis & Design, IT Service Management

Cybersecurity & Risk: Data Backup & Disaster Recovery, CCTV & Physical Security, Cybersecurity Fundamentals

Core Competencies: Business-Technology Translation, Stakeholder Communication, Problem-Solving, Project Coordination, Attention to Detail

EDWELL CHINYEPERA

PROFESSIONAL SUMMARY

Information Systems graduate who bridges the gap between physical infrastructure and intelligent automation. Not a desk bound theorist I've physically upgraded server hardware, optimized network cabling, and coded Python solutions that slash legal processing time by 80%. Hands on experience maintaining mission critical ERP systems (APEX/Pastel) and ensuring business continuity through robust data backups and low downtime network management. Final year thesis tackled a US\$1.2 billion challenge in Zimbabwe's agricultural sector by delivering a data-driven decision-support system. Eager to translate this blend of technical resilience and business acumen into a graduate role in Data Analytics, Systems Analysis, or Software Development.

WORK

EXPERIENCE

FreelanceDeveloper	Jan 2024 - Present
Engineered a Python-based PDF automation solution for a legal firm, slashing manual document processing time by 80% and virtually eliminating costly human data-entry errors. Design and deploy custom web-based solutions for diverse small businesses, translating vague client requirements into intuitive, user-friendly software that streamlines daily operations.	

IT Support Technician Intern	Jan 2025- Feb 2026
Bowtracker Safaris, Antelope Park	
Managed end-to-end IT infrastructure—spanning computers, servers, routers, and network cabling—to maintain 99.9% system uptime, directly safeguarding business continuity and team productivity across the organization. Spearheaded a hardware modernization initiative, upgrading legacy HDDs to high-speed SSDs and optimizing WiFi networks, drastically cutting boot or load times and eliminating system performance bottlenecks. Implemented automated, redundant data backup protocols, guaranteeing rapid disaster recovery and safeguarding sensitive business data against permanent loss or corruption. Audited, inspected, and optimized the physical network cabling architecture—from tower transmission points to destination endpoints—ensuring signal integrity and future-proofing the organization's network against infrastructure degradation.	

EDUCATION

Bachelor ofCommerce Honours Degree in Information Systems	2026
Midlands State University	
Degree Class: 2.1	
Advanced Level Certificate	
ZIMSEC: 3 Passes	2022
Ordinary Level Certificate	
ZIMSEC: 7 Passes including Mathematics and English	2020

PROFESSIONAL QUALIFICATIONS

PROFESSIONAL
DEVELOPMENT

Diploma in Information
Systems (Completed)

ADDITIONAL INFORMATION

- Languages: English (fluent), Shona (native)
Availability: Immediate start

INTERESTS

- Machine Learning & AI: Actively exploring how AI can solve real world problems currently experimenting with predictive models for agricultural yield forecasting.
- Chess: Sharpens my strategic thinking and patience skills I apply to systems analysis and problem solving.
- Football (Soccer): Enjoy both playing and analyzing match tactics teamwork and strategy in action.
- Agriculture: Passionate about leveraging tech to improve food security
- Reading Tech & Business Articles: Stay up to date with industry trends, emerging technologies, and business strategies through blogs, podcasts, and publications.
- Project Management: Naturally drawn to organizing, planning, and leading initiatives applied in my freelance projects and academic group work.
